## Skills

---

JavaScript

React

Node.js

Express

HTML

CSS

REST APIs

Databases (e.g., MongoDB, PostgreSQL)

## Experience

---

### Software Engineer

AI Startup - Anytown, USA (2023-Present)

Developed and maintained key features for an AI-powered chatbot using Python and NLP libraries (e.g., NLTK, spaCy). Implemented machine learning models, including intent recognition and dialogue management, resulting in a 15% improvement in user satisfaction. Contributed to the development and documentation of REST APIs for seamless chatbot integration with various platforms. Deployed and scaled chatbot applications on AWS using services like EC2, Lambda, and API Gateway.

## Education

---

### Bachelor of Technology

Dronacharya College (2018-2022)
